

Defoamer for UV Coating VP 9843

Properties:

Defoamer for UV Coating VP 9843 solves every foaming problem.

Use:

We recommend to mix the defoamer directly into the UV coating.

Defoamer for UV Coating VP 9843 can be used for all VEGRA UV coatings.

Dosage:

Generally, our UV coatings are designed in a way that no foaming problems are to be expected under standard processing conditions. If you should still experience foaming, please add 1 - 3 % (related to the UV coating) of **Defoamer for UV Coating VP 9843**.

Note:

Do not use this product for dispersion coatings.

Packing:

Carton with 12 bottles of 1 kg

Cans of 10 kg or 25 kg

The specifications given in this brochure are based on laboratory tests and practical experience. All specifications are to the best of our knowledge and reflect the latest state of the art, however, this does not imply any liability.
