

## Film Cleaner VP 9241

**For removing glue residues, dirt and finger prints  
from films and mounting foils**

### Characteristics:

**Film Cleaner VP 9241** is a very pure solvent, containing hydrocarbons and produced by distillation. It cleans free from reams without leaving residues. The film cleaner evaporates very quickly and can therefore be used for various purposes in repro and pre-press. The film cleaner contains no fluorine chlorinated hydrocarbons (FCHC), nor chlorinated hydrocarbons (CHC).

- Due to the distillative production, the film cleaner is free from contaminations and therefore it cleans without difficulty and without leaving residues.
- Due to the quick evaporation the copy quality is not impaired.
- The film cleaner can be filled into hand spayers.

### Application:

Put a few drops of the film cleaner on a cloth (without fluffs) and wipe off the surface to be cleaned.

### Safety measures:

Flash point about - 12°C

Keep container tightly closed

Keep away from sources ignition

The film cleaner must not enter the drainage system.

### Packing:

Carton with 12 bottles of 1 l

Tin cans of 20 l

Tin drums of 200 l

The specifications given in this brochure are based on laboratory tests and practical experience. All specifications are to the best of our knowledge and reflect the latest state of the art, however, this does not imply any liability.
